Web Technologies Lab

Lab 06   **Marks 100**

Instructions
Work on this quiz/lab individually.

You are **NOT** allowed to use internet, mobile phone.

You are **NOT** allowed to borrow anything from your peer student.

What you have to do
Program the following tasks. The name of your files will be according to the task given in this lab.

Task   [100]

Create a small application to save the records of employees in an organization. Create a class **Employee** with attributes `int id, string name, static double salary, string rank` and implement the following functions:

- to read/load data from *csv* file; create objects and add it to a collection.
- to add a new object into collection.
- to write all the objects from collection to a *txt* file.
- to remove an object from collection based on id.

Create a **Driver** class, and show the functionality of your program using a switch menu.

Instructions:
- You can read data line by line from a csv file, and then split the data based on comma.

☺ ☺ ☺ **BEST OF LUCK** ☺ ☺ ☺
